ABOUT ME

I am an experienced front-end engineer with over 2.6+ years of expertise in software development. Proficient in **React.js, Next.js, JavaScript**, and **TypeScript**, I have successfully built web and mobile applications from scratch, demonstrating my ability to analyze and manage projects effectively. With a strong foundation in data structures and algorithms, I am adept at solving complex problems and delivering efficient solutions. My skills in **HTML, CSS, Redux, and Material UI** allow me to create visually appealing and user-friendly interfaces. Known for my ability to work well under pressure, meet deadlines, and deliver high-quality work, I consistently strive for excellence in every project I undertake.

WORK EXPERIENCE

Sep 2022 - Present
Divami Design Labs Pvt. Ltd.

Software Engineer

I have extensive experience with React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Redux, Material UI, JIRA, Git, and Material UI High Charts. Notably, I contributed to AI-powered data analytics platforms in the "Right Data" project using React.js and Next.js, and made valuable contributions to the "AI Educator" project for personalized learning experiences.

Feb 2022 - Sep 2022
NFTically

Full Stack Developer

Using React.js, JavaScript and HTML, I created the NFTically website, an online platform for selling virtual NFTs. I also contributed to the Market NFTically website, implementing features such as NFTport integration, a form for users to create their own stores, and enhancements to ERC721 and ERC1155 functionalities. Additionally, I collaborated with the SEO team to optimize both the NFTically and Market NFTically websites for better search engine visibility.

Jan 2021 - Feb - 2022
EzyLegal

Software Development Engineer

I have worked on a diverse tech stack, including React.js, JavaScript, HTML, and CSS. My recent projects involved developing an Admin Interface from scratch, which included implementing a login flow, managing product commissions, and creating a Content Authoring system with user-friendly UI and APIs. Additionally, I developed a brand-new About Us page for the website, which and integrated a coupon code flow. Moreover, I have been developing a document template for the company and successfully addressed several existing production bugs. You can check out my work at https://www.ezylegal.in/

PROJECTS

Right Data (RDT.ai)

Technology Used :- React.Js, JavaScript, HTML, CSS, Material Ui, Redux, High Charts.

- Actively involved in creating the architecture of applications, providing a solid foundation for scalability and maintainability. By adhering to industry best practices and standards, I establish guidelines for optimal performance, security, and functionality.
- Created modular and reusable components that enhanced code modularity and efficiency, reducing redundancy and promoting code reusability.
- Developed robust routing functionality that facilitated seamless navigation between different pages, providing a smooth and intuitive user experience.Development of smooth routing for page navigation.
- Utilized custom hooks to encapsulate and reuse common logic, promoting code modularity, and facilitating easier maintenance and updates.
- Proficient in working on projects from inception to implementation, including conceptualization, design, and development. This comprehensive approach ensures a cohesive and streamlined development process.

AI Educator

Technology Used :- React.js, TypeScript, HTML, CSS, SCSS, Redux, Material UI.

- Developed features for the MCQ flow, enabling creation, management, and presentation of multiple-choice questions, along with answer submission and feedback functionalities.
- Implemented functionalities for the assignment flow, including assignment creation, due date management, resource attachment, and submission and grading processes.
- Conducted code refactoring to enhance maintainability and improve the overall quality of the codebase.
- Utilized custom hooks to encapsulate reusable logic, promoting code modularity and reusability.
- Took complete ownership of project deliverables, ensuring timely completion and successful outcomes.
- Made significant contributions to AI-powered data analytics platforms and personalized learning experiences.
- Conducted code refactoring to enhance maintainability and improve the overall quality of the codebase.

EzyLegal

Technology Used :- Next.js, TypeScript, HTML, CSS, Redux.

- Developed admin interface from scratch, including login, product commission management, and content authoring. Designed intuitive UI and integrated APIs for seamless backend communication.
- Created a new About Us page from scratch, showcasing company's mission, values, and achievements with compelling content and visually appealing layouts.
- Implemented coupon code flow on the website, enabling users to apply and redeem discounts during transactions. Ensured a smooth and hassle-free coupon code experience.
- Developed custom document templates for proposals, contracts, and reports, enhancing consistency and professionalism in company documents.
- Addressed numerous production bugs, improving overall website performance and user experience through thorough debugging and effective troubleshooting.
